

Nacra 5.0

Featuring the new square top Pentax mainsail

The Nacra 5.0 combines simplicity and ease of sailing with the modern look that made Nacra famous.

The Nacra is undoubtedly one of the finest production boats available in the 16ft range.

The skeg type hullshape features fine V forward sections for high pointing and true tracking whilst the rounded aft sections give the 5.0 the ability to manoeuvre for easy tacks and fast gybes.

Simplicity and value are the key components of the 5.0

Featuring Nacra's bridle foil, which allows the jib to be sheeted down lower, giving more power with less healing motion.

Kick up rudders ensure easy beaching and simple sailing.

For those who like to keep their high performance sailing simple and hassle free the 5.0 is unbeatable.

Boomless, limitless the Nacra 5.0 is the multirole catamaran capable of racing at the highest level or quietly cruising with friends on a lazy afternoon sail.

Nacra 5.0 has been called the pocket rocket.

Plus Nacra's 5 year warranty
